

Relax & Reshape: BOTOX®

What is BOTOX®? What conditions may be treated?

If you cannot relax those tense muscles on your face, modern medicine can do it for you. **BOTOX®**, a synthetic protein, relaxes these muscles and thereby reduces or eliminates the appearance of facial wrinkles.

Correctable conditions include forehead wrinkles, frown lines, crow's feet, saggy eyebrows, nasolabial folds, sagging corners of the mouth, necklines, and wide facial shape due to enlarged masseter muscles.

When and What Results Might Be Expected?

How long does the results last?

Modest to dramatic improvements within two weeks of treatment may be expected to last up to five months.

What is the recovery like?

When can I return to work and activities?

Recovery is usually none. Minimal swelling and bruising are expected. Use of prescribed pain medicine is not necessary. Make-up can be applied immediately. Most patients return to work and regular activities either immediately or within one weekend.

Any treatments to help maintain or enhance my results?

Minor adjustments, maintenance, or further enhancements can often be done non-surgically with **MDSun** skin care, **BOTOX®**, **Thermage™**, **ReFirme™**, **Fillers**, or **Non-Surgical Facelift**. More extensive changes may require further surgical shaping.
